

Smart Waste Monitoring System

Analytics & Performance Report

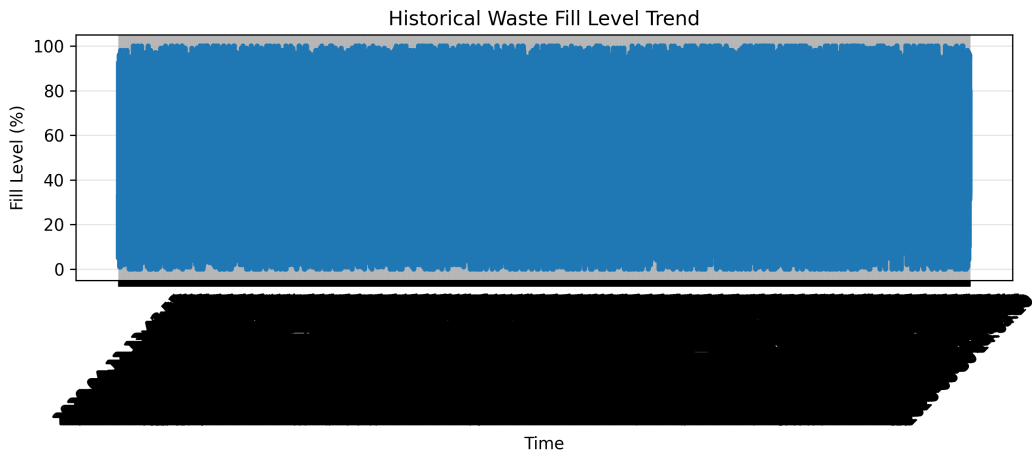

Report Generated: 2026-06-30 19:35:36

System Overview

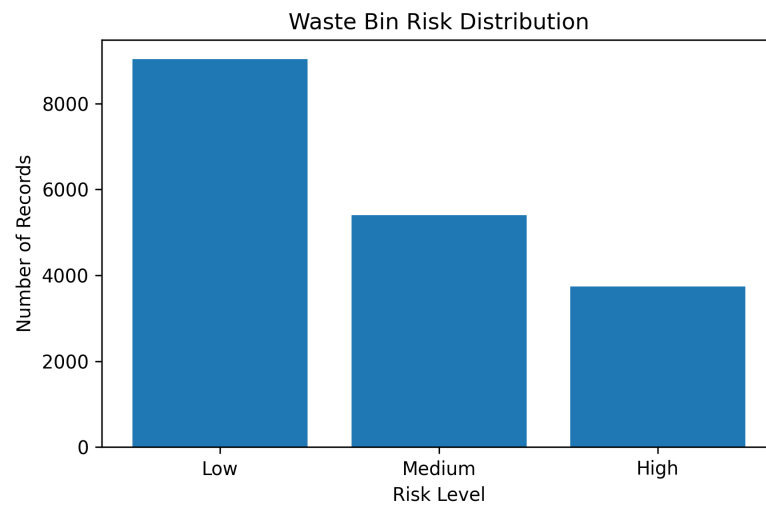

This report presents analytics generated from the smart waste monitoring system. The system analyses bin fill levels and identifies collection priorities.

Metric	Value
Total Records Analysed	18165
Average Fill Level	49.7%
Critical Records	3736
Highest Risk Bin	BIN-001
Highest Fill Level	100%

Historical Trend Analysis

Risk Distribution Analysis

System Assessment:

The analytics module successfully evaluates historical waste accumulation patterns. The generated insights support efficient monitoring and collection planning.
